

The astronomical GROWTH. How PagSeguro has become a global game-changer?

EXPAND

In the digital world, growing slowly is not enough anymore. You need to scale globally. Expand exponentially. Therefore, in 2018 PagSeguro went public and raised about \$2,27 billion in its initial public offering on the New York Stock Exchange.

PERFORM

Expanding is no doubt a challenge. How to keep the wheel of innovation constant and fast? How not to extrapolate fixed costs amid gigantic demands? That's where Invillia comes in. Where a growth challenge starts, our **Global Growth Framework** begins. We have a partnership with PagSeguro since 2011. Today we manage dozens of 100% custom-built Squads dedicated to any PagSeguro digital innovation demand.

CONNECT

All of that is only possible due to a strong connection we have with PagSeguro's business purpose. Our unique framework creates an environment of high trust, transparency and a sense of belonging within all of us. Joint teams do not see separation between one company and the other. We are connected and we cheer together with the results. No geographical boundaries. No corporate boundaries. No limits to innovation.

OPPORTUNITIES

We connect, we perform, we expand. We create opportunities. This is the reason of our existence. We feature in dozens of digital innovations for PagSeguro. We co-innovate with our mixed Squads. Today, millions of Brazilian entrepreneurs are able to expand their business with practicality, simplicity and to earn income thanks to the Technologies we help to develop.

ALWAYS MOVING FORWARD

We are present in all strategic areas of PagSeguro. From constant innovations in payment machines such as the pioneering Moderninha, throughout the development of prepaid card and easy shipping, to solutions focused on logistics and information security,

Together on this journey, the result couldn't be other rather than the astronomical growth of PagSeguro.

“Our partnership with Invillia is a longstanding one. Together we deliver dozens of projects. Invillia has always shown technical competence and commitment to our projects. Today, Invillia's teams are an extension of our internal teams, we can't see a difference and the relationship is very transparent.”

Cesar Augusto - PagSeguro Director
